

Burkburnett-Ranger Oil Co.

Capital Stock \$500,000

Shares \$1.00 Par Value

Fort Worth, Texas

This is interesting to any person interested in buying shares of stock in oil Companies. This Company will guarantee dividends immediately.

The BURKBURNETT-RANGER OIL COMPANY, Capital \$500,000, \$1.00 per share, par value, 405 Main St., Ft. Worth, Texas, has the following propositions.

An undivided interest in the Famous Norwood Tract in Ranger, which contains 751 acres and 19 wells now drilling, now paying big dividends, it has 30 acres in the Desdemona field, which is absolutely proven. It has 160 acres on well located land in Comanche County, close to production, which the geologist say will be a producer, also have 50 acres in the John E. Roller Tract, Burkburnett field, with six producing wells.

Any person interested in oil development can secure no better stock than in this Company.

Address all communications for stock at \$1.00 per share, par value to D. D. Wilson, Trustee of the Burkburnett-Ranger Oil Company.

A GRAPEVINE CINCH

If everyone in Fort Worth and the rest of the world knew what everybody in Grapevine knows, you would not be able to get a dollar's worth of the Grapevine Producing Company's stock that is now selling at \$12.50 per share.

The Grapevine Producing Company is drilling a well near this little town on a location made by Hugh H. Tucker, the distinguished geologist who located the Granite (Okla.) Pool, and whose opinion regarding oil has yet to be disproven. This well is now down about 1,170 feet and running true to Dr. Tucker's prediction, two good showings having been encountered in the shallow sands. They expect to get a gusher at about 2,600 feet.

Every geologist who has made detailed examinations and surveys over Central Texas, which list includes such men as Hugh H. Tucker, W. J. Flair, W. N. Wood, R. F. Gerrells, Dr. Cooke, W. E. Wrather, Secretary of the National Geologists' Association, agree that there is a well-defined, anticlinal structure in the northeastern part of Tarrant County, and government statistics show that about 90 per cent of such structures contain oil in paying quantities.

Of course, there is oil in other places, but if you want to know what a cinch is, ask any "banker, baker or candle-stock maker" in Grapevine and he will tell you to buy all the interests you can in the Grapevine Producing Company or the Grapevine Development Co.

AN UNUSUAL OPPORTUNITY

The Bear Oil Company, organized by prominent Fort Worth citizens, associated with recognized oil men, owns leases on 5,000 acres of land favorably located on this structure, and is drilling a well on a location selected by two of the geologists above referred to.

Four thousand acres surrounding and near this location has been platted into five-acre lots, and the Company is selling leases on these lots for \$100, and with each lot is given \$50 worth of stock in the Company, which is capitalized for \$150,000.00.

We believe this to be one of the best oil investments being offered to the public today, and every Fort Worth citizen that is able should buy one or more of these leases.

If either Company should get a well, every owner of a lease and every stockholder will not only profit in an extraordinary way, but it will help every other citizen of Fort Worth.

Bear in mind that we are presenting an unusual plan, offering an opportunity for the greatest gain for the amount invested, with the smallest chance of losing. That is, you can lose a little or make a lot. Not two for one, but thousands for one, that can only be made by investing in a new field before the bit strikes the oil.

DON'T LOSE OUT WAITING TO SEE IF IT PANS OUT—Sign inclosed application blank and send it to the

SUBSCRIPTION.

I hereby make application for a lease on _____ lots of Bear Oil Company holdings as of record in Tarrant County, and here-with tender \$_____, in payment for same. It is my understanding that the Bear Oil Company is now drilling a well on their block of leases as shown by plat thereof, and that I am to get \$50 worth of stock with each five-acre lease.
